The Prez Sez:

Burr it's cold.....

I thought that last months newsletter was my last until my secretary reminded me that I still have this months to do. So I will finish with this letter. As the weather basically is keeping us indoors it is time to do some building new planes or even repairing planes that had mishaps during the summer. I have seen some that need drastic repairs, or as Steve Petranyi would say, "BURN IT!". That's all part of the hobby. I hope everyone had a Merry Christmas and wish all a Happy New Year. With the new year here let us get our club off to a good start by attending January's meeting. Showing support for the club and incoming president John Fischer. I will close by saying once again, thank you for your support for the past very successful two years and hopefully it will continue for many more. As Bugs Bunny would say, That's All Folks. Remember this is your club and you do make a difference. See you at the meeting.

Have a nice flight

JOHN
